Abstract

AI-powered networking assistant using FastAPI, Streamlit, DistilBERT, GPT-2 and Wikipedia API.

Objectives

Generate conversation starters, analyze events, fact check information, and maintain history.

Technology Stack

Python, FastAPI, Streamlit, Transformers, Torch, Pydantic, Requests, Pytest.

Architecture

Streamlit UI -> FastAPI Backend -> Event Analyzer -> Topic Generator -> Fact Checker.

Modules

Event Analyzer, Topic Generator, Fact Checker, History Logger, Feedback Logger, API Routes.

Testing

Unit tests with pytest and API tests using httpx TestClient.

Conclusion

A modular AI application demonstrating NLP, REST APIs and modern Python development.
